Introduction to the DOME Digital Wallet

The DOME Digital Wallet is an essential tool for managing your digital identity within the DOME Marketplace. It enables secure interactions by allowing users to store, manage, and utilize digital credentials effectively. This wallet supports various functionalities including signing in, credential management, and QR code scanning for credential verification or issuance. Access the wallet by visiting DOME Digital Wallet.

For a detailed walkthrough on setting up your account and the initial steps to access the DOME Marketplace, please refer to the official Onboarding Guide. This guide will help you understand the prerequisites and steps to get started with DOME.
