

# 3. Data validation: DLT

Once we have the issued credential, we need to generate our machine's addresses using this tool: [Dome](#)

The screenshot shows the 'DOME Access Node Key Generator' interface. At the top, there is a title 'DOME Access Node Key Generator'. Below it is a text input field labeled 'DID Key' with the placeholder text 'YOUR FULL DIDKEY'. A blue button labeled 'Generate Keys' is positioned below the input field. The output section, titled 'DLT keys', is enclosed in a red border and contains three items: 'Private Key' with the value '0x9f0ab45b5e5640c305210993f5375914753d9a9d2073d8a014ee1e87803c9d39' and a 'Copy' button; 'DLT Address' with the value '0x5fa5969b1D4A6ab849c857C443867305720098f7' and a 'Copy' button; and 'ISS' with the value '0x36ca17caf31e23e3e93695c89e5c767477eaad9bc388822e0259000d0a8c8af7' and a 'Copy' button.
