

Credential Revocation

If you need to revoke a legacy credential, please see [this section](#).

1. Revoke Credential (standard)

Once a user activates a credential, its status in the Issuer is set to **"VALID"** (see the [Credentials Management article](#)). A valid credential can be revoked, which means it will be effectively disabled and can no longer be used for authorization purposes.

To revoke a credential, simply click the **"Revoke"** button and confirm the action.

The screenshot shows the DOME Issuer interface. At the top, there is a blue header with the DOME Issuer logo on the left and the text "Nikola Tesla INGENIERIA DE LA INFORMACION SOCIEDAD LIMITADA" on the right. Below the header, there is a left navigation arrow and a "Credential details" section. The "Credential details" section contains a card for "LEAR Credential Employee" with a "VALID" status, valid dates from 07-11-2025 to 07-11-2026, and a red "Revoke" button. Below this card are sections for "Mandator" (ID: did:elsi:VATES-B60645900) and "Issuer" (ID: did:elsi:VATES-B60645900, Name: Seal Signature Credentials in SBX for testing, ID card number: 5656F). A modal dialog titled "Revoke Credential" is overlaid on the screen, asking "Are you sure you want to revoke this credential?" with "CANCEL" and "ACCEPT" buttons.

After confirmation, a success message will be displayed, and you will be redirected to the **credentials dashboard**, where the credential's status will now appear as **"REVOKED"**.

The screenshot shows a table with the following data:

test.com	VATBG-BG131283323	LEAR_CREDENTIAL_MACHINE	10-11-2025, 10:20h	REVOKED
----------	-------------------	-------------------------	--------------------	---------

You can also verify the revocation on the **credential details page**.

Credential details

<p>LEAR Credential Machine</p> <p>Valid from: 10-11-2025</p> <p>Contact email: tstoyanov@qualityhouse.com</p>	<p>REVOKED</p> <p>Valid until: 10-11-2026</p>
--	--

2. Revoke Legacy Credential

Old credentials can't be revoked in the way that has been explained in the previous section. Credentials of this type will have the "Revoke button" **disabled**.

Credential details

<p>LEAR Credential Employee</p> <p>Valid from: 13-11-2024</p> <p>Contact email:</p>	<p>VALID</p> <p>Valid until: 13-11-2025</p>	<p>Revoke</p>
--	--	---------------

When putting the mouse on it (or clicking on it), a tooltip message will be displayed with a link to the guide you are currently reading.

Credential details

<p>LEAR Credential Employee</p> <p>Valid from: 13-11-2024</p> <p>Contact email:</p>	<p>VALID</p> <p>Valid until: 13-11-2025</p>	<p>This credential cannot be revoked because it was issued using a legacy type. To learn how to revoke this type of credential, please check our guide</p>
<p>Mandator</p>	<p>Issuer</p> <p>ID</p>	

Legacy credentials must be manually added to the Revoked credentials list. Please check the [Trust Framework guide](#) to learn how to do so.

Revision #12
