

List of terms

As far as possible and in order to enhance consistency with the regulation, we use in this document the following definitions, which is essentially a subset of the definitions in Article 3 of the document [[eIDAS2.Regulation](#)] and in the original [Regulation \(EU\) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC](#).

This is the reason why in some definitions below the description refers to an article or section that does not exist in this document. We have decided to keep the definitions like in the original, as we think it does not limit the understanding of the concept.

electronic identification

means the process of using person identification data in electronic form uniquely representing either a natural or legal person, or a natural person representing a legal person;

electronic identification

means a material and/or immaterial unit, including European Digital Identity Wallets or ID cards following Regulation 2019/1157, containing person identification data and which is used for authentication for an online or offline service;

person identification data

means a set of data, issued in accordance with national law, enabling the identity of a natural or legal person, or a natural person representing a legal person to be established;

electronic identification scheme

means a system for electronic identification under which electronic identification means, are issued to natural or legal persons or natural persons representing legal or natural persons;

user

means a natural or legal person, or a natural person representing a legal person using trust services, notified electronic identification means or European Digital Identity Wallets;

authentication

means an electronic process that enables the verification of the origin and integrity of data in electronic form;

identification

means an electronic process that establish an unequivocal relationship between a set of data and a natural or legal person;

validation

means the process of verifying that an electronic signature, an electronic seal, a European Digital Identity Wallet, an electronic identification mean, a relying party authorisation, person identification data, an electronic attestation of attributes or any electronic certificates for trust services is valid and has not been revoked;

zero knowledge proof

means cryptographic methods by which a relying party can validate that a given statement based on the electronic attestation of attributes held in a user's European Digital Identity Wallet is true, without conveying any data related to those electronic attestation of attributes to the relying party;

relying party

means a natural or legal person that relies upon an electronic identification means, including European Digital Identity Wallets, or a trust service, directly or through an intermediary, in order to provide services;

public sector body

means a state, regional or local authority, a body governed by public law or an association formed by one or several such authorities or one or several such bodies governed by public law, or private entity mandated by at least one of those authorities, bodies or associations to provide public services, when acting under such a mandate;

body governed by public law

means a body defined in point (4) of Article 2(1) of Directive 2014/24/EU of the European Parliament and of the Council (1);

signatory

means a natural person who creates an electronic signature;

electronic signature

means data in electronic form which is attached to or logically associated with other data in electronic form and which is used by the signatory to sign;

advanced electronic signature

means an electronic signature which meets the requirements set out in Article 26;

qualified electronic signature

means an advanced electronic signature that is created by a qualified electronic signature creation device, and which is based on a qualified certificate for electronic signatures;

electronic signature creation data

means unique data which is used by the signatory to create an electronic signature;

certificate for electronic signature

means an electronic attestation which links electronic signature validation data to a natural person and confirms at least the name or the pseudonym of that person;

qualified certificate for electronic signature

means a certificate for electronic signatures, that is issued by a qualified trust service provider and meets the requirements laid down in Annex I;

trust service

means an electronic service normally provided against payment which consists of:

- (a) the creation, verification, and validation of electronic signatures, electronic seals or electronic time stamps, electronic registered delivery services, electronic attestation of attributes and certificates related to those services;
- (b) the creation, verification and validation of certificates for website authentication;
- (c) the preservation of electronic signatures, seals or certificates related to those services;
- (d) the electronic archiving of electronic documents;
- (e) the management of remote electronic signature and seal creation devices;

qualified trust service

means a trust service that meets the applicable requirements laid down in this Regulation;

conformity assessment body

means a body defined in point 13 of Article 2 of Regulation (EC) No 765/2008, which is accredited in accordance with that Regulation as competent to carry out conformity assessment of a qualified trust service provider and the

qualified trust services it provides;

trust service provider

means a natural or a legal person who provides one or more trust services either as a qualified or as a non-qualified trust service provider;

qualified trust service provider

means a trust service provider who provides one or more qualified trust services and is granted the qualified status by the supervisory body;

electronic seal

means data in electronic form, which is attached to or logically associated with other data in electronic form to ensure the latter's origin and integrity;

advanced electronic seal

means an electronic seal, which meets the requirements set out in Article 36;

qualified electronic seal

means an advanced electronic seal, which is created by a qualified electronic seal creation device, and that is based on a qualified certificate for electronic seal;

electronic seal creation data

means unique data, which is used by the creator of the electronic seal to create an electronic seal;

certificate for electronic seal

means an electronic attestation or set of attestations that links electronic seal validation data to a legal person and confirms the name of that person;

qualified certificate for electronic seal

means a certificate for an electronic seal, that is issued by a qualified trust service provider and meets the requirements laid down in Annex III;

electronic seal creation device

means configured software or hardware used to create an electronic seal;

qualified electronic seal creation device

means an electronic seal creation device that meets mutatis mutandis the requirements laid down in Annex II of [eIDAS.Regulation];

electronic time stamp

means data in electronic form which binds other data in electronic form to a particular time establishing evidence that the latter data existed at that time;

qualified electronic time stamp

means an electronic time stamp which meets the requirements laid down in Article 42 of [eIDAS.Regulation];

electronic document

means any content stored in electronic form, in particular text or sound, visual or audiovisual recording;

electronic registered delivery service

means a service that makes it possible to transmit data between third parties by electronic means and provides evidence relating to the handling of the transmitted data, including proof of sending and receiving the data, and that protects transmitted data against the risk of loss, theft, damage or any unauthorised alterations;

qualified electronic registered delivery service

means an electronic registered delivery service which meets the requirements laid down in Article 44;

European Digital Identity Wallet

means an electronic identification means which securely stores, manages and validates identity data and electronic attestations of attributes, to provide them to relying parties and other users of European Digital Identity Wallets on request, and which enables the creation of qualified electronic signatures and seals;

attribute

is a feature, characteristic or quality of a natural or legal person or of an entity;

electronic attestation of attributes

means an attestation in electronic form that allows the presentation and authentication of attributes;

qualified electronic attestation of attributes

means an electronic attestation of attributes, which is issued by a qualified trust service provider and meets the requirements laid down in Annex V;

authentic source

is a repository or system, held under the responsibility of a public sector body or private entity, that contains attributes about a natural or legal person and is considered to be the primary source of that information or recognised as authentic in Union or national law;

electronic archiving

means a service ensuring preservation of electronic data or documents in order to guarantee their integrity, the accuracy of their origin and legal features throughout the conservation period;

qualified electronic archiving service

means a service that meets the requirements laid down in Article 45g;

EU Digital Identity Wallet Trust Mark

means an indication in a simple, recognisable and clear manner that a Digital Identity Wallet has been issued in accordance with this Regulation;

strong user authentication

means an authentication based on the use of at least two authentication factors categorised as user knowledge, possession and inherence that are independent, in such a way that the breach of one does not compromise the reliability of the others, and is designed in such a way to protect the confidentiality of the authentication data;

user account

means a mechanism that allows a user to access public or private services on the terms and conditions established by the service provider;

personal data

means any information as defined in point 1 of Article 4 of Regulation (EU) 2016/679;

identity matching

means a process where person identification data or person identification means are matched with or linked to an existing account belonging to the same person;

offline service

means the capability of a user to electronically identify and authenticate with a third party with close proximity technologies irrespective of whether the device is connected to the internet or not in order to access a wide range of public and private services;
