Policies

Defining policies

> - How can a Service Provider create policies that concern the Products that they offer ?
> - How can a Marketplace Operator create policites that concern the Products that they host ?

Local policies

> That only the federated marketplace needs to enforce locally.

Distributed policies

> That everyone in the federation needs to enforce.

Enforcing policies

In front of TMForum API

> i.e. marketplace -to- Access Node PEP, PDP - when are they needed and when not ?

In front of Context Broker API

> i.e. Access Node -to- Access Node
